Message from the Managing Director

Management is, above all, a practice where art, science and craft meet

We **Senate laboratories** are committed to realizing the promise of human potential in all spheres and stages of life.

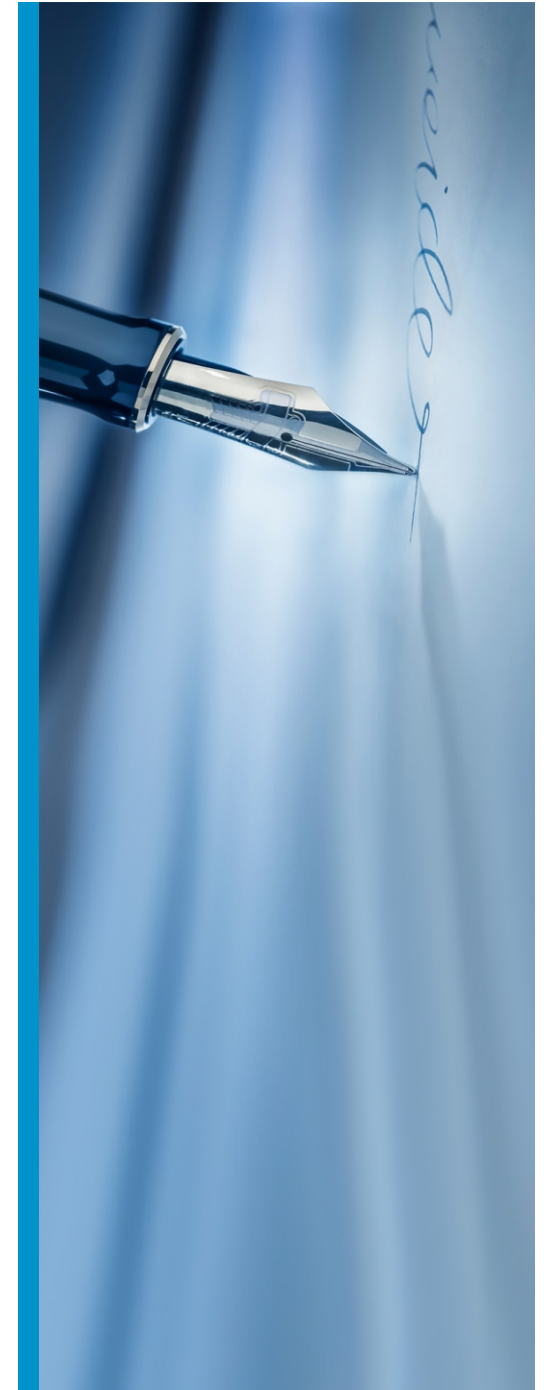

We believe that living a healthy lifestyle is critical to achieving the human dream. And that is why our commitment to assisting people in achieving their optimal health at every stage of life will never end. This is how we live out that belief each and every day.

Our vision is to become an advanced technology & research based Contract Manufacturing pharmaceutical company and to emerge out as a intellectually strong player in domestic as well as in international market. From domestic company at inception,

Senate laboratories has grown formidably to an integrated, research based, contract manufacturing pharmaceutical company with a strong strategy of Contract manufacturing.

Managing Director

What We Do

We do nothing, but everything for our Patients

We are able to make a footprint in our health care sector with punctuality, sincerity, honesty, loyalty, dedication, ethical practice, positive attitudes of our professionals. We strive to access to safe, effective and affordable medicines and related health care services to the people who need them. We believe that **Senate Laboratories** will be able to provide the best possible products in pharmaceuticals sectors with quality, diligence and transparency.

We are strongly represented in the market by a growing line of products, some of which are the **FIRST TIME** in INDIA. Our manufacturing plant is with state of the art of technology, operated by qualified quality assurance and quality control personnel. For manufacturing our products, we procure high quality raw materials from reputed sources across the globe. We do believe **QUALITY** is not conned in the production site, rather **QUALITY** is the result of collaboration with development, design, procurement, production, promotion, sales, after-sales service and other areas of business process. That is why we maintain **QUALITY** not only in the manufacturing site, but also in customer service. We always try to do, what customers expect from us.

WHAT
WE DO?

Our Commitment

We are here to serve the public; we assist them in their pursuit of a healthy lifestyle. This has been **Senate Laboratories** approach for over a decade-passionately and thoughtfully translating science into meaningful contributions to health. Caring is at the heart of our work and defines our obligation to those we serve. We seek to earn the trust of those we serve by adhering to the highest quality standards, personal excellence, and behaviour that is characterized by honesty, fairness, and integrity.

Our company's promise is embodied in the promise that our work holds for health and life. We at **Senate Laboratories** are committed to advancing healthcare innovation. All of our efforts are focussed on developing novel treatments for significant unmet medical needs. Our quest for more effective ways to maintain and restore health has resulted in a steady stream of ground-breaking therapeutic and diagnostic products and services over the last three decades.

Senate Laboratories is dedicated to earning the trust of physicians, patients, and customers. Our associate worldwide believe that trust is not easily earned, which is why we strive to be champions for our associate each day. **Senate Laboratories** has spent the last three decades establishing a new breed of health care company. **Senate Laboratories** is committed to developing long-term relationships with our associate based on mutual trust. This is manifested in a variety of ways. Our scientists earn trust by discovering and developing novel, science-based medicines and services that improve people's health and well-being worldwide. Our marketing teams, colleagues at our plants, and others at all levels of the organization view each day as a new opportunity to earn trust.

All of this requires diligence, dexterity, integrity, and transparency on the part of **Senate Laboratories** associates. Our global team is dedicated to sustaining and expanding the use of novel treatments. We are committed to doing our part to ensure that everyone has access to high-quality health care. Additionally, we are committed to excellence in three critical strategic areas: people, products, and processes

Our People

The quality of people's life is directly proportion to the commitment of excellence

Working at **Senate Laboratories** is like being part of an extended family. Our culture, our communication channels and people centered management policies make us one of the best organizations to work. Our congenial work environment and open channel communication foster creativity, responsibility and a sense of ownership in every employee.

Our management personnel are experienced and skilled professionals with distinguished career records. Their clear vision to the company's target and dynamic leadership are shaping **Senate Laboratories** into a company capable of coping with future challenges.

The team spirit of the employees emanates essentially from their dedication and sincerity to the company's cause.

Sharing knowledge, working together and harmonizing all tasks are some important aspects that **Senate Laboratories** focuses on in regards to its employees, thus striving in earnest to establish a corporate culture within itself. As a part of our global standard strategy, we have given high priority on employees up-to-date knowledge and development. The Human Resources Division of the company is engaged not only in recruiting the best people, but also regularly invest in the training and development to push their career ahead. Through our HR initiatives, we are continuously working to create an industry standard environment where goals and aspirations of the employees are intertwined with the company's success.

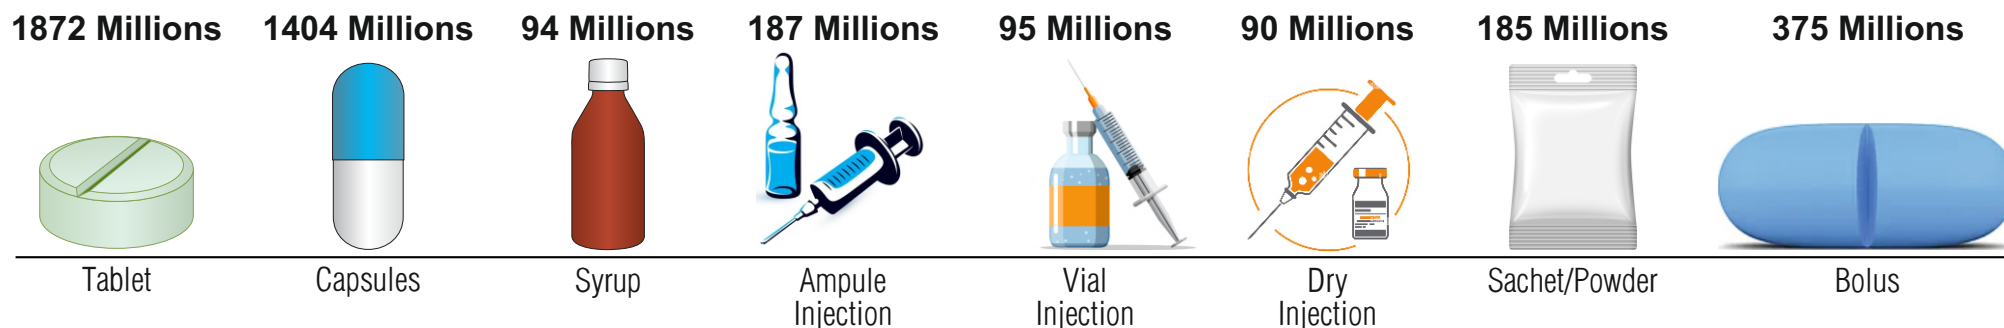

Our Plants

Weaving dreams into reality

Manufacturing Unit:

Our manufacturing plant is located in Sisona, Bhagwanpur which is about 10 km away from Roorkee city, Dist-Haridwar. This is a state-of-the-art manufacturing facility for **Tablets, Capsules, Syrup, Ointment, Liquid & Dry Injection** dosage forms and all facilities have been developed meeting the requirements of WHO-GMP/GLP. The plant is designed for segregation of raw materials, proper management of in-process materials, and storage of finished products under controlled conditions. We have segregated and dedicated manufacturing facilities for general production and Cephalosporin production. Highly sophisticated HVAC systems are used to control the environmental condition, monitor and supply clean air to the working zone according to the WHO-GMP/GLP compliance manufacturing zone concept, capture and control any dust, vapour, gas or fume generated, as well as treatment of exhausted air. Segregated heating, Ventilation and Air conditioning systems are designed to facilitate the manufacturing process and to prevent cross-contamination. The manufacturing operations are carried out according to the validated procedure maintaining man-material flow by using most modern and sophisticated machineries.

General Production Unit: Production capacity per Year.

Quality Control Department:

Senate Laboratories has a well-equipped quality controlled department led by a Manager from the very beginning of its commencement. Latest instrument and apparatus, most recent methods, processes and technologies, and qualified people including Pharmacist, Chemists and Microbiologist are the main strengths of this department. From the entry of the raw and packing materials to the exit of the finished goods, this department plays a vital role.

Senate Laboratories has a Quality Control Department comprising physical, chemical, instrumental, microbiological sections and equipped with state of the art analytical and microbiological quality control instruments for our quality control at each and every stage of the manufacturing process. Quality Control Department is followed by the guideline of BP, USP, W.H.O.-GMP, GLP and ISO 9001:2015 management system.

Quality Assurance Department:

Quality Assurance is a wide-ranging concept covering all matters that individually or collectively influence the quality of a product. The totality of the arrangements made with the object of ensuring that pharmaceutical products are of the quality required for their intended use. The system of Quality Assurance appropriate to the manufacture of pharmaceutical products should ensure W.H.O.-GMP and GLP. **Senate Laboratories** has implemented a comprehensive quality system (ISO 9001:2015). Quality Assurance (QA) procedures ensure that the quality of the products is maintained by strict compliance with international pharmacopoeias (BP, USP, etc) specifications on raw materials, packaging materials and finished products. This department enables implementation, assessment, and reporting which is necessary for guaranteeing that the products manufactured by maintaining W.H.O.-GMP and conform to the requirements and expectations of the customers. This department is responsible for maintaining all documents, records and standard operating procedures (SOP), making sure that they are up to date. We accord the highest priority to quality control and adequate precautions are taken to ensure that there are no lapses on this front.

Product Development Department:

Our Product Development Department has been contributing to a very fast growth of our product line in the market. Their efforts are the reflection of our belief in quality and innovation. Driven by our aspiration to become an international pharmaceutical company we have built expertise in innovation and development. Our efforts are focused on the development of cost-effective, high-quality drugs and on bringing down the cost of medicine to amicable levels for all.

ETP (Euent Treatment Plant):

Waste materials generated during operation are neutralized through different chemical and biological treatment (ETP). Waste materials are removed at appropriate intervals and properly disposed. The capacity of the ETP is 1000 lit/hr. The output (water) of the treated material is environmental friendly and even suitable for gardening.

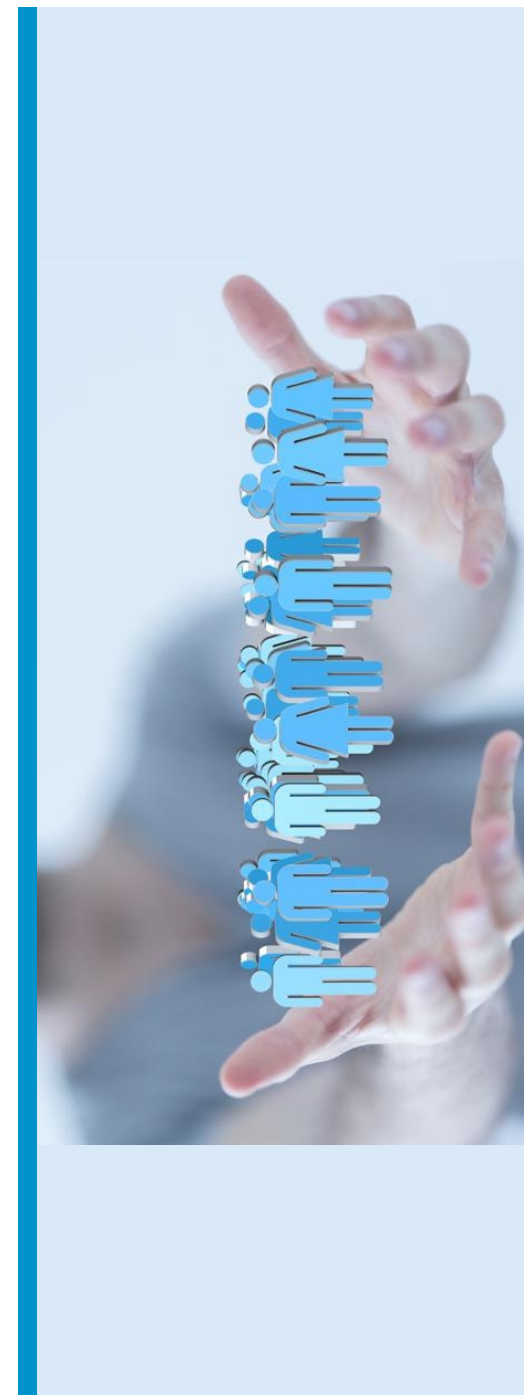

Third party engagement

In case of a business opportunity the company policy permits contract (loan license and third party) manufacturing activity. For analysis occasionally, we use services of approved public testing laboratories. However, the final batch release is the authority of our Quality Assurance, after review and audit of batch production, batch packing and analysis record. Contract manufacturing (P to P / 3rd Party manufacturing) is one of the major services offered by **Senate Laboratories**. We have applied for manufacture over 2000 different formulations in Tablets, Capsules, Syrup, Ointment, Liquid & Dry Injection dosage.

We are committed for

- Formulating customized product size, shape, colour, taste, and packaging as per requirement of customer and their market.
- High efficacy formulations comparable to brand leaders meeting pharmacopeia and prescribed drug standards.
- Critical products with assured stability throughout the shelf life.
- Timely supplies without botheration of follow ups.
- Large as well as small size batch sizes as per need of customer Our manufacturing Product Formulation List provides all the details of products formulation which we applied and currently offer for contract manufacturing.

Please feel free for contacting us for new product development even if not listed in our current product formulation list.

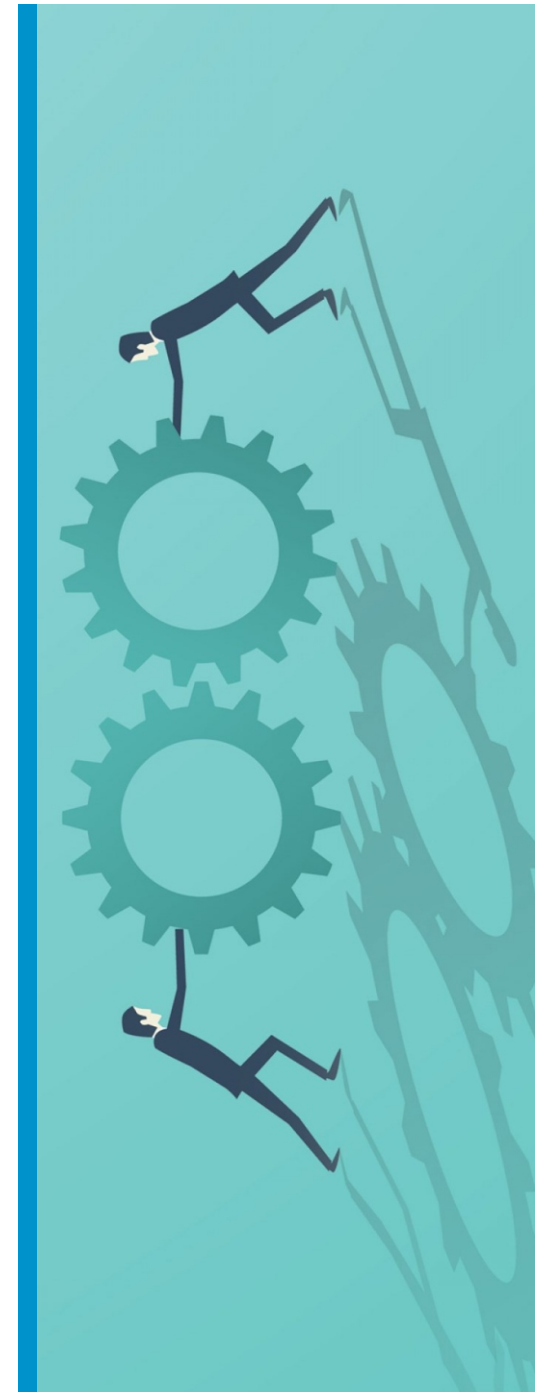

Our Business Operation

Honesty is the first chapter in the book of business

Domestic Market :

Our Domestic market is the mainstream of our business. Step by Step **Senate Laboratories** touches its 17th business year successfully. Now we operate our domestic business with 180 products in different dosages form including Tablets, Capsules, Syrup, Ointment, Liquid & Dry Injection. From the very beginning to today, we have developed in different parameters including management and production systems as well as value sales and profitability of the company. We have skilled qualified team and they are very much influential in the pharma market. We are absolutely focused on customer satisfaction that's why we are able to retain our sustainable growth. We are committed to our associates to make their dreams come true that is to make a witness in our peoples health through quality products at an affordable price. Our domestic market is driven by indoor marketing department that is called Product Management Department (PMD) through a group of dynamic, innovative, young and energetic people. Their innovation is also the pathway of our success. The main objective of this department is to establish a brand through innovative strategies and onwards to achieve company's vision, mission, goal and objectives. We have a dynamic sales team which consists of about 60 graduate people. They are the major contributors of our domestic business.

International Business Operation

There's no locality on the web- every market is a global market

Global pharmaceutical industry is one of the most sensitive and regulated business sectors. INDIA develops this sector due to its industry friendly government policies and now this industry fulfills 98% of the local market demand. In addition to that INDIA is exporting more than 150 countries around the world including USA, UK, and European Union. Extension of the WTO TRIPS gives us the opportunity to produce any patented products in generic version and that creates a huge opportunity for us to go for contract manufacturing since we have the capacity and technology for it.

Senate Laboratories gives priority in International Business from the beginning, we have started our export operation and exploration in April, 2007 formally by recruiting dedicated person for exploring export market. We got our first product registration in 2009 from FDA Myanmar and started formal export in mid of 2009. Recently we have got the W.H.O.-GMP certificate from FDA, Uzbekistan which strengthen our export business. Now we have regulatory business with 9 countries and with other 5/6 countries our registration process is ongoing. We have a strong desire to put our strong footing in Africa in 2023 onwards.
